

Under-Sink Measurement Worksheet

Record the usable space, sketch the obstacles, then trial the layout.

Use one unit throughout. Leave the dimensions blank until you measure.

Location / cabinet

Units: ☐ in ☐ cm

01 Record the usable space

Interior width

Usable depth with doors closed

Minimum clear height

Door opening: width x height

Hinge / center-support limits to allow for

02 Sketch pipes, valves and other obstacles

Mark where storage cannot go and where you need clear access.

Front or top view - your choice

03 Compare an intended bin or tray

Bin width

Bin depth

Bin height

04 Trial the removal and access checks

- ☐ Bin removes through the opening without moving plumbing.
- ☐ Doors close clear of the bin, its contents and the pipes.
- ☐ Valves and pipe connections stay visible and reachable.

Measurements alone do not prove fit; complete the physical checks.
